## EDUCATION

University of Illinois Chicago

Graduation: December 2025

Bachelor of Science in Computer Science

GPA: 3.87/4.0

**Coursework:** Advanced Data Structures and Algorithms, Artificial Intelligence, Database Management Systems, Machine Learning, User Interface Design and Programming, Economics and Computation

**Honors & Leadership:** Dean's List (2022 – 2025), Orientation Leader (2023), and CS Ambassador (2024)

## SKILLS

**Programming Languages:** Python, Java, TypeScript, JavaScript, C++, C, SQL, C#, and Go

**Full Stack & Cloud:** React, Next.js, Flutter, FastAPI, Flask, Docker, AWS, GCP, Kubernetes, and PostgreSQL

**Agentic AI & LLMs:** LangChain, LangGraph, Fetch.ai uAgents, Anthropic Claude SDK, Codex, Groq, and n8n

## WORK EXPERIENCE

Software Engineering Intern (Summer & Fall)

June 2025 – December 2025

*Invision Capital*

*Chicago, IL*

- Rebuilt Invision Capital's website on Webflow with a structured content management system, Google Analytics 4, and automated Attio lead routing, eliminating fragmented tracking and increasing qualified inquiries.
- Architected AI-powered workflows in n8n to source investors and targets, enrich data, and generate due-diligence checklists, reducing deal cycle work by almost 10%.
- Constructed a fixed asset management application in React with a Flask server and MySQL database using Agile methodologies to implement 7+ custom depreciation methods and maintain all company assets.

Lead Web Developer

July 2023 – August 2025

*Engineering Administration at University of Illinois Chicago*

*Chicago, IL*

- Built and managed UIC Engineering's 500+ pages WordPress site with custom JavaScript and RED integrations.
- Deployed Google Analytics 4 and Tag Manager for behavioral insights, leading to 2.6% increase in website traffic.
- Collaborated with the marketing team to update web content and analyze traffic trends for targeted ad campaigns.

Head Teaching Assistant (Advanced Data Structures and Algorithms)

January 2023 – May 2025

*College of Engineering at University of Illinois Chicago*

*Chicago, IL*

- Mentored and debugged code for 800+ students over 6 semesters, with a focus on data structures and algorithms.
- Coached students with Optiver, Motorola, and Allstate on 200+ projects, guiding from development to deployment.
- Led technical interviews, graded, and conducted debugging sessions for full-stack projects in React and Flask.

## PROJECTS

**Enterprise Augment Portal:** Retrieval Augmented Generation

January 2026

- Built a graph driven RAG software with multi agent orchestration using LangGraph, LangChain, and LangSmith.
- Implemented hybrid search retrieval with Celery and Redis for high throughput asynchronous document ingestion.
- Deployed on AWS using ECS on EC2 behind an Application Load Balancer to improve scalability and reliability.

**Tariffarm:** Winner of WildHacks at Northwestern University (Flask, Next.js, Gemini API, Auth0) April 2025

- Created a full-stack international trade website enabling users to estimate import costs with real-time tariff data.
- Engineered a custom BFS based trade optimizer that ran across land, sea, and air, enabling best trade decisions.
- Visualized optimal routes in Next.js and used Gemini prompts to annotate maps with cost and timing.

**ArtSee:** Agentic AI (Fetch.ai uAgents, Claude 4, Groq, React)

July 2025

- Built a collaboration app that matches creators and automates end-to-end, real-time deal negotiation with agents.
- Engineered a two stage, rule based and LLM judged matcher with top 3 selection and adaptive-round negotiation.
- Used Claude 4 for accurate ranking and Groq for low-latency counteroffers, with schema checks and audit logs.

**Super Health App:** Winner of SparkHacks at University of Illinois Chicago (Tkinter, SQLite) February 2024

- Developed a health assistant that unifies doctor search, prescription tracking, and mindfulness in one app.
- Structured data in a normalized schema with indexed tables to keep records consistent and queries fast.
- Implemented a rule-based scheduler for recurrences, dosing, conflict checks and content filtering in the database.
